CHARGING OPTIONS

Recharger: USB 5V charger 100-240V 50/60Hz

The battery can be charged using the supplied USB or USB-C charging cable and USB or USB-C charging adapter from the socket. It is also possible to charge the battery using an alternative USB or USB-C socket - simply unplug the USB cable from the plug and connect it to a power bank, laptop or in the car, for example. Our USB or USB-C 5V charging adapters 100-240V 50/60Hz can be used worldwide (EU or US plug).

# SUSTAINABILITY

## SUSTAIN OUR PLANET - PERCEIVE SUSTAINABILITY

There has never been a time in mankind before, when taking care of sustainability was as important as it is now! As a company selling its products worldwide, it is important for us to do it the right way: right for our planet - right for our future - right for ourselves.

## TOGETHER FOR A CLEANER ENVIRONMENT

We have set ourselves an ambitious goal: Together with CleanHub, we want to prevent 3,000 kg of plastic waste from ending up in the environment, in landfills, or in our oceans. 1 kg of plastic is roughly equivalent to 80 PET bottles.

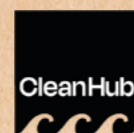

### Why we are committed

Protecting and preserving nature is important to us. That's why we make sure to avoid plastic in our packaging as much as possible and continuously reduce our ecological footprint. To make an active contribution to combating global plastic pollution, we are working with CleanHub. This organization supports the collection and safe recycling of plastic waste in regions where a functioning waste infrastructure is often lacking. This prevents plastic from entering the oceans via rivers and coastal areas.

### Transparency and measurable impact

By supporting plastic recycling projects in disadvantaged communities, we are helping to protect valuable natural habitats and ecosystems. Every piece of collected plastic waste is digitally recorded and tracked along the entire value chain. This ensures that the collected materials are processed responsibly and achieve the greatest possible ecological and social benefit.

So that future generations can also enjoy nature in all its diversity, producers.

## 100 % FREE OF SINGLE-USE PLASTIC

More than 300 million tons of plastic are produced every year. In Europe, the packaging industry accounts for 40 percent of plastic, which is why we have decided not to use single-use plastic for our products and thus making our contribution to protect the ocean.

## 100 % GREEN ELECTRICITY

We are aware of our planet, our climate and our future; therefore we use green electricity at our headquarters and in our warehouse generated 100% from Austrian hydropower.

## RECYCLING

Together with the company Interseroh we make sure that our packaging is recycled saving our planet's resources.
